### EDUCATION

#### GLA University

*Bachelor of Technology in Computer Science and Engineering*

- Cumulative GPA : 8.51/10.0

MATHURA ,UP

2023 – 2027

### TRAINING / EXPERIENCE

#### Full Stack Development with Startup Assistance (JOVAC'25)

June 2025 – July 2025

W3Grads — GLA University, Mathura

- Completed 45-day summer training focused on full stack web development and startup fundamentals.
- Built web solutions using modern technologies and learned product-building strategies.
- Gained practical experience through real-world use cases and startup simulations.

### PROJECTS

#### Tiffin Tales

- A full-stack platform connecting home-chefs with students and working professionals for healthy homemade meals.
- Designed and built a **scalable MERN-based platform** enabling users to **subscribe and order tiffin services** with live order tracking.
- Empowered **local women entrepreneurs** by providing a digital storefront to earn from home-cooked food, driving social impact.
- A mission-driven ecosystem that **digitally empowers women to launch micro food businesses from home kitchens**.

#### PathBuddy : AI Career Coach Platform

- Developed an AI-driven platform for **personalized career guidance**, offering resume optimization, interview prep, and real-time market insights. .
- Leveraged **OpenAI API** to simulate job-specific interviews and deliver contextual, real-time feedback for targeted skill improvement.

### CERTIFICATIONS

#### Generative AI – Google Cloud

- Understood how Generative AI models create text, images, and media using pre-trained models.
- Explored Vertex AI and learned the basics of prompt engineering for Gen-AI applications.

#### Learning AI Through Visualization – Columbia University (Virtual)

- Gained foundational knowledge of AI through visual examples.
- Explored AI model explainability and how decisions are made by systems.

#### GFG 160 – 160 Days of Problem Solving – GeeksforGeeks

- Solved 160+ curated DSA problems (arrays, strings, trees, graphs).
- Improved problem-solving with structured daily challenges.

### TECHNICAL SKILLS

**Languages:** Java, Python, JavaScript, HTML/CSS

**Frameworks & Libraries :** React.js , Node.js , REST APIs

**Concepts:** Data Structures & Algorithms(Java) , Object Oriented Programming, Problem Solving

**Tools :** Postman, Git ,Azure(Basics) Visual Studio Code

### ACHIEVEMENTS

**Solved 350+ problems** across platforms (245+ on GeeksforGeeks & 114+ on LeetCode), building a strong foundation in algorithms, data structures, and time-optimized coding.

**Secured AIR 1034 in CodeClash – DSA MasterMind**, outperforming thousands of national participants through a rigorous MCQ-based DSA elimination round.

**Achieved 1 (Max Rating: 1133)** on CodeChef and participated in **4+ national-level coding contests**, consistently improving speed, accuracy, and problem-solving strategy.
